RESPONSIBILITIES WILL INCLUDE:

- 3

- Inspection of the scaffold including weight limitations, scaffold type, fall protection, tie-offs, supports, etc.
- Overseeing the erection of the scaffold
- Final inspection of the scaffold prior to initial occupation for use.
- At a minimum, daily inspection and documentation of the condition of the scaffold and its ability to be occupied safely.
- Inspections of scaffolds after changes / alterations have been made.
- Oversight and inspections of mobile scaffolds.
- Training of other competent persons, scaffold erectors, and users.
- Contact EHS for assistance and guidance in any of the duties associated with being a Competent Person.
- Examining the scaffold tag (which should be affixed near the access point) to verify that a competent person has deemed the scaffold safe for use. This must be done prior to initial use of the scaffold each shift.
- Refusing to occupy a scaffold prior to the Competent Person providing documentation indicating that the scaffold has been inspected and deemed safe. Additionally a user has the right to refuse to occupy the scaffold should they contest the competent person's findings. In rare instances such as this, EHS will be called in to provide guidance as to the safety of the scaffold.
- Notifying the competent person of any safety concerns associated with the erection, conditions, use, and / or maintenance of the scaffold.
- Utilizing scaffolds in accordance with all local, state, federal, manufacturer, and institutional rules and regulations.
- Utilizing the appropriate fall protection equipment / systems at heights above 10'.
- Inspecting all scaffold components prior to assembly to insure that components used are of similar material and in good repair before becoming a part of the completed scaffold. This includes (but is not limited to): mudsills, screw jacks, frames, braces, planks, access ladders, brackets, etc.
- Contacting and coordinating with the Competent Person regarding any issues associated with the erection of a scaffold.
